Risk Assessment

At VRA we understand sporting and leisure venues, because it's the business we are in.

That is why we are acknowledged as an authority on risk management and sporting and leisure venue assessment.

We provide a professionally rated assessment that covers all aspects of sporting and leisure venues - from the surfaces and surroundings where participants enjoy their sports, right through to the areas for spectators and the general public.

As we are independent, we provide an objective and unbiased viewpoint on all the facilities we assess. We are committed to making a contribution towards improving the safety of all sporting and leisure facilities.

Using our extensive experience and expertise we provide an independent report which gives comprehensive feedback.

The VRA report provides the information to monitor the effectiveness of a maintenance program and the basis for a cohesive approach to maintenance planning.

Risk Management

As experts in the areas of Risk Management and Risk Assessment, VRA works with clients to develop a specialised Risk Management program.

Risk Management provides significant benefits to VRA clients, such as major improvements to venue safety. This can lead to reductions in the likelihood of accidents and injuries, a reduction in insurance claims and also provides a powerful aid in the defence of legal action, leading to a positive impact on insurance premiums.

Definition: Risk Management

“The method by which we identify, analyse and evaluate risk exposures and options for dealing with those risks.”

Trust in vra

VRA also provides Loss Adjusting and Contingency Supervision Services throughout Australia. For further information please contact VRA.
